

AFRA JUWAIIRIYA

Chennai 600077 | 9319039045 | afrajuwairiya@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year BCA student (graduating April 2026) with hands-on experience building Power BI dashboards, Python data pipelines, and SQL-backed reporting systems. Demonstrated ability to translate raw operational data into structured, decision-ready insights. Proficient in PostgreSQL, Pandas, DAX, and Scikit-learn. Seeking an entry-level Business or Data Analyst role in Bangalore or Hyderabad.

EDUCATION

Anna Adarsh College for Women

Graduating April 2026

Bachelor of Computer Applications (BCA)

Relevant Coursework: Data Analytics & Visualization | Advanced Excel | Python Pro Bootcamp | Intro to AI

SKILLS

Analytics & Reporting	SQL (PostgreSQL, joins, aggregations, window functions) Power BI (DAX, KPI scorecards, dashboards) MS Excel (pivot tables, VLOOKUP)
Programming & Data	Python (Pandas, NumPy, Scikit-learn, Random Forest, data pipelines) REST API integration (World Bank, Google APIs, Yahoo Finance)
Tools & Platforms	PostgreSQL pgAdmin Git & GitHub Google Cloud VM Google Maps API HTML / CSS / JavaScript
Soft Skills	Stakeholder communication Structured documentation Cross-functional coordination Analytical problem-solving

WORK EXPERIENCE

Fantek | Python Developer Intern

Chennai | May 2025 – Sept 2025

- Built Power BI dashboards with DAX-driven KPI scorecards, eliminating manual reporting for non-technical stakeholders
- Wrote Python scripts to automate data collection and reporting workflows, improving accuracy and turnaround time
- Maintained data pipelines, dashboard updates, and structured reporting across multiple operational functions
- Coordinated cloud infrastructure and project workflows on Google Cloud VM instances

Fantek | Freelance Analyst & Web Developer

Chennai | Jan 2026 – Present

- Developed a full-stack company website (HTML/CSS/JS + PostgreSQL) serving as both a marketing platform and client-facing portal
- Built an admin portal with login system to manage client requirements and operational data, backed by a PostgreSQL relational database
- Integrated REST APIs for lead capture and client inquiry workflows, with structured data feeding into business review reports
- Connecting PostgreSQL client data directly to Power BI via virtual server for live operational dashboards (in progress)

Resource Square Solutions | Trainee Recruiter (Part-time)

Chennai | Mar 2024 – May 2024

- Maintained candidate tracking records and coordinated interview scheduling across multiple hiring stakeholders
- Ensured accurate documentation and timely follow-up throughout hiring pipelines, improving coordination efficiency

PROJECTS

Global Supply Chain & Vendor Performance Analytics Platform

Feb 2026 – Present

- Designed a normalised PostgreSQL schema across 5 tables tracking 5,000+ purchase orders, 50 suppliers, and 4,800 shipments across 5 regions
- Integrated World Bank LPI and GDP data via REST API for real-time country-level supplier risk scoring
- Engineered 8 KPIs (OTIF rate, defect PPM, weighted supplier scores) using Python/Pandas across 14,000+ records
- Trained a Random Forest risk model (17 features, 73.5% accuracy) and delivered a 4-page Power BI dashboard with heat maps, defect trends, and DAX scorecards

Real-Time FinTech Portfolio Analytics Engine

Academic Project

- Connected PHP/SQL frontend to a Python/Pandas backend via Yahoo Finance API to track 15+ live assets with automated ROI and sector analysis
- Generated sector allocation visualisations to surface portfolio risk exposure, replacing manual valuation workflows

Geo-Location Café Finder

Academic Project | [GitHub](#)

- Integrated Google Maps JS API and Places API for real-time location search; used Geolocation API to handle permissions and dynamically centre maps
- Built responsive UI using async JavaScript to manage API cycles and render search results dynamically
